PROFILE

BSIT student specializing in full-stack development. Proficient in the MERN stack with strong experience in React, MongoDB, and modern front-end tools. Passionate about building scalable, responsive applications. Quick learner eager to master Next.js in a professional environment. Collaborative, proactive, and strong in logical problem-solving.

WORK EXPERIENCE

Freelance Full-Stack Developer

Private Client

October 2025 - December 2025

Project: Study Buddy - Collaborative Learning Platform

- Rapidly developed and deployed a comprehensive study platform using MERN stack for web and React Native Expo for mobile, delivering complete solution within tight 3-month timeline

EDUCATION

BS in Information Technology

Technological University of the Philippines - Taguig 2022 - Present

- Attended seminars, webinars, and training sessions on various IT topics such as web development, artificial intelligence (AI), machine learning (ML), data science, etc.
- Established partnerships with student-led IT organizations, professional societies, and industry associates to facilitate collaboration and knowledge exchange.
- Developed and deployed multiple small and large full-stack dynamic web and mobile applications as a team and individual work.

PROJECTS

BayanCoop

- A full-stack e-commerce system that bridges cooperatives and farmers to strengthen local economies. It enables coop-to-coop and farmer-to-farmer trading, promoting sustainable product exchange and community-driven commerce.

Sentinel

- A digital mental health platform that allows users to book professional consultations and interact with an AI companion for real-time emotional assistance. Designed to enhance mental wellness accessibility through intelligent and empathetic technology.

Trueself

- A community-driven platform for the LGBTQ+ sector featuring interactive forums, an AI-based anxiety assessment tool, and personalized mental health recommendations—empowering users to connect, share, and prioritize well-being.
